

Success Seminar

Franco & Ivy Lopez

Emerald Directs
Philippines

“Our greener pasture is with our family, in our own country.”

Franco is a manager in one of the top trading firms in the country. Ivy, a nurse, used to be an Overseas Foreign Worker, but is now a government employee. The lessons of the 1997 Asian financial crisis taught them to never again have only one option, so they invested in traditional side businesses, while pursuing their careers.

When this business was presented to them a few years ago, they were not enthusiastic about it. They were busy starting their family and were already living a good life. However, after an accidental exposure to the power of N21 functions and investigating for themselves what the business can truly offer, they realized that they had been too busy making a living and they had forgotten to really live their lives. After building the business for 2 years to Platinum, then Emerald, they say, ‘We are still as busy as before, but we have now started to check off our dreams and travel the world together as a couple.... and we are just beginning!’
